

BorderPay

Cross-border payments, simplified.

Stablecoin-powered settlement for businesses trading across
Northern Ireland and Ireland

< 30s

Settlement

< 0.5%

Fees

£12.4B

Corridor

WHY NORTHERN IRELAND?

The perfect place for BorderPay

EU Single Market Access

NI stays in the EU single market for goods under the Windsor Framework

UK Market Access

Full access to the UK internal market — the best of both worlds

Dual-Currency Corridor

Businesses trade daily in both GBP and EUR — massive demand for fast, cheap FX

£12.4B Cross-Border Trade

Over twelve billion pounds flows across the NI-Ireland border every year

THE BREXIT IMPACT

How Brexit made cross-border payments **even harder**

New Trade Barriers

Brexit created customs checks and paperwork for NI-Ireland goods

2021

Protocol introduced

Regulatory Complexity

NI businesses now follow both UK and EU rules

2x

regulatory burden

Fintech Still Expensive

Even Revolut, Wise and Stripe charge 1-3% on cross-border business FX

1-3%

on business FX

30,000+ Affected

From suppliers and payroll to invoices and tax

30K+

cross-border businesses

THE PROBLEM

Revolut, Wise & Stripe are **not** **enough**

They improved consumer transfers — but still rely on the same slow, expensive banking rails underneath.

Still Expensive

1–3%

They convert GBP → EUR through banking partners — each hop adds a spread.

Not Instant

1–2 days

Funds still move via SWIFT or SEPA — queued through intermediary banks.

No Dual-Currency

2 wallets

Hold GBP or EUR, never both. Every payment triggers an FX conversion.

Not Built for NI

0 products

Generic global platforms with no features for the NI-Ireland corridor.

THE SOLUTION

BDRP — the dual-pegged **stablecoin**

1 BDRP = 50% Euro + 50% British Pound — reducing FX volatility across both currencies.

Instant Settlement

Built on Solana — under 30 seconds

On-chain finality replaces SWIFT

Regulation-Ready

FCA & MiCA compliant by design

Licensed in both UK and EU

Built for the Border

Purpose-built for NI-Ireland

30K+ businesses, £12.4B corridor

WHY BDRP IS FASTER & CHEAPER

BDRP vs Revolut / Wise / Stripe

	COMPETITORS	BDRP	HOW
Settlement	× 1-2 days	✓ < 30 sec	On-chain — no SWIFT, no clearing
Fees	× 1-3%	✓ < 0.5%	No FX conversion — dual-peg
Dual Peg	× N/A	✓ GBP+EUR	50/50 basket — zero drift
NI Focus	× Generic	✓ Purpose-built	Windsor Framework aware
Transparency	× Closed	✓ On-chain	Solana — real-time audit

They improved banking. **We're replacing the rails entirely.**

WHY IT'S FASTER

Different rails, different speed

REVOLUT / WISE / STRIPE

1-2 business days · 1-3% fees · 6 intermediaries

BORDERPAY (BDRP)

< 30 seconds · < 0.5% fees · 3 steps · No intermediary banks

WHY IT'S CHEAPER

The dual-peg eliminates FX conversion

Revolut / Wise / Stripe

1. Sender holds GBP
2. Platform converts GBP → EUR
(1–3% spread applied here)
3. EUR sent via SEPA/SWIFT
4. Correspondent bank takes cut
5. Recipient receives EUR (minus fees)

BorderPay (BDRP)

1. Sender deposits GBP → mints BDRP
2. BDRP already holds 50% GBP + 50% EUR
(No FX conversion needed!)
3. BDRP sent on Solana (< 30 sec)
4. Recipient redeems BDRP → EUR
5. Full value received (< 0.5% total)

What is BDRP?

BDRP (BorderPay) is a dual-pegged stablecoin backed by a basket of Euro and British Pound. 1 BDRP = 50% Euro + 50% British Pound. Its value stays stable by tracking both EUR and GBP together, reducing FX volatility for cross-border payments.

Zero FX Slippage

Pay Belfast in GBP or Dublin in EUR from the same BDRP balance. No spread, no conversion fees.

Instant Settlement

Cross-border payments settle in under 30 seconds on-chain, not 2-3 business days.

Fully Reserved

Every BDRP is backed 1:1 by segregated GBP and EUR reserves. Transparent and auditable.

One Balance, Two Economies

No need for separate GBP and EUR floats. BDRP unifies your treasury.
